Title
PhD opportunities in first class research environment

Institution
Hannover Medical School is the leading faculty in medicine in Germany. The graduate school, Hannover Biomedical Research School (HBRS), was founded in 2003 and is the umbrella for three PhD programs: MD/PhD "Molecular Medicine", PhD "Infection Biology"/"DEWIN", PhD "Regenerative Sciences"; Info:https://www.mhh.de/hbrs

Position
The three-year study programs, taught in English, are aimed at post-graduates in Medicine, Veterinary Medicine as well as those from Life Science fields. The PhD program "Regenerative Sciences" is also open to students from the various disciplines of Materials Sciences. As well as working on a 3-year research project, students also attend seminars, lab and soft-skill courses, congresses, symposiums and summer schools. Successful candidates will finish with a PhD, alternatively Dr. rer. nat. Scholarships are to be fully funded by MHH, partner institutes and their respective departments.

Responsibilities
3-year research projects; structured training program

Requirements
We are looking for highly-motivated candidates who have an active interest in one of the fields associated with one or more of the programs on offer. Excellent written and spoken English skills are required. With nearly two thirds of our students coming from outside Germany, international applicants are welcome. Students need to have a Master, Diploma or Staatsexamen.

Application procedure
Please send us your preferences by clicking on the respective program in our online application process, more info on https://hbrs.cloud.opencampus.net/
