Title
CRC 1287 Short-term fellowships 2022

Institution
University of Potsdam, the Collaborative Research Centre CRC 1287 “Limits of Variability in Language: Cognitive, Computational, and Grammatical Aspects”

Position
The linguistic system exhibits a high degree of variability at all levels of linguistic description. This variability in language can be characterised as a range of different possible linguistic behaviours that are available to an individual language user, a group of language users, or in specific languages. The variability is limited by the constraints of the underlying linguistic system and shaped by cognitive and social or communicative factors. This variability is not just reducible to random noise but provides an important source of information to explain and predict linguistic behaviour. By modelling the factors influencing linguistic behaviours, the CRC (21 PIs in 13 scientific projects, one transfer project, and three service projects) contributes to a better understanding of the underlying mental representations and processing architectures in individual language users, as well as of the grammatical options available in individual languages and specific linguistic varieties, and options shared by particular subgroups of languages users.

The CRC provides a fantastic research infrastructure including a large interdisciplinary network of researchers and its own graduate school (the MGK - Integrated Research Training Group: https://www.uni-potsdam.de/en/sfb1287/projects/special-projects/mgk).

We are offering several three- to four-month fellowships to external PhD candidates who would like to carry out a collaborative research project within one of the projects of the CRC. Please see the available projects here: https://www.uni-potsdam.de/en/sfb1287/projects

The monthly fellowship is tax exempt and covers a basic amount (1365 EUR) plus direct costs (103 EUR) plus 400 EUR per child, if applicable. Holders of the grant need to cover health insurance on their own.

The University of Potsdam has a vibrant and interdisciplinary scientific community spanning many disciplines, including leading groups in the field of cognitive sciences (http://www.uni-
The University of Potsdam values the diversity of its members and pursues the goals of equal opportunities regardless of gender, nationality, ethnic and social origin, religion/belief, disability, age, sexual orientation or identity. In the case of equal suitability, women in accordance with Section 7 (4) BbgHG and people with a severe disability will be given preferential consideration.

Responsibilities
Carrying out a collaborative research project within one of the projects of the CRC 1287.

Requirements
The fellowships require completed academic studies at an institute of higher learning (Master's degree or equivalent) and enrolment in a PhD programme. Applicants are also required to establish contact with the principal investigators of the project of interest well before submitting the application in order to discuss the possibility of collaboration and the details of the proposed research project.

Application procedure (deadline etc.)
Please send your application as a single PDF file including: (1) a statement of research interests and motivation, (2) a full CV, (3) a short research proposal for the duration of the fellowship, (4) the names and e-mail addresses of at least two referees, (5) academic transcripts, (6) list of publications/talks/presentations, and (7) a web-link to a copy of the Master's thesis to Dr. Anastasiya Dockhorn-Romanova MGK-SFB1287@uni-potsdam.de. The research proposal should have a title and state which project within the CRC the short-term researcher wants to be affiliated with (e.g., “B01”).
The deadline for the application for a fellowship in 2022 is September 30, 2021. Late applications may be considered if positions are unfilled.
