Title

Post-Doc (m/f/d) in the field of Circular Value Creation

Institution

as soon as possible | temporary up to 36 month | full time | Faculty of Computer Science and Engineering Science | Campus Gummersbach

Position

- remuneration up to EG 14 TV-L depending on personal requirements
- insights into interdisciplinary research contexts and the opportunity for scientific development
- flexible working hours and home office options
- family-friendly working conditions and environment
- a wide range of further education and training opportunities for your individual professional and personal development
- opportunities to participate in university sports and health promotion programmes
- internal university events (e.g. lectures, company outing, readings, summer festival, etc.)
- free parking at the building
- discounted job ticket for local public transport
- digital communication and work processes within the team
- annual bonus according to TV-L
- 30 days holiday

Responsibilities

- responsible participation and second point of contact in the establishment of the cross-faculty interdisciplinary research cluster "Circular Transformation Lab Cologne"
- identification and coordination of suitable funding measures
- independent project acquisition at federal and european level
- personal and scientific responsibility in project planning and implementation as well as independent management of R&D projects
- establishment and maintenance of an interdisciplinary network to actively promote the volume of third-party funding and to broaden the visibility of research topics
- participation in and supervision of selected projects and publications
- coordinating the development of research guidelines and research strategies
- independent inter-faculty teaching in the area of circular value creation, to the extent of 2SWS
Requirements

• university degree (Master's level) as well as Ph.D. in the fields of natural sciences or engineering, ideally with a focus on sustainability
• sound experience in applying for and implementing third-party funded projects, ideally also in leading interdisciplinary project teams
• extensive knowledge of project management
• extensive and up-to-date expertise in the field of resources and sustainability
• extensive experience in research cooperation
• experienced in the use of common MS Office programmes
• very good knowledge of German and English
• strong communication and conflict management skills
• excellent organisational skills

Application procedure (deadline etc.)

The TH Köln stands for equal opportunities and strives to increase the proportion of women in research and teaching. Applications from women will therefore be given preferential consideration in the case of equal suitability. Severely disabled persons and persons of equal status will also be given preferential consideration in the case of equal suitability.

In accordance with the requirements of §2, 1 WissZeitVG, the job offer is exclusively directed at applicants who can be employed for their own scientific qualification. Employment is dependent on your individually used qualification periods as a scientific employee.

We look forward to receiving your application!

Application deadline: Nov 22, 2021
