**Title**

Head of Scientific Center Management Regenerative Therapies (f/m/d)

**Institution**

The mission of the Berlin Institute of Health (BIH) is medical translation: transferring biomedical research findings into novel approaches to personalized prediction, prevention, diagnostics and therapy and, conversely, using clinical observations to develop new research ideas. The aim is to deliver relevant medical benefits to patients and the population at large. The BIH is also committed to establishing a comprehensive translational ecosystem as translational research area at Charité – one that places emphasis on a system-wide understanding of health and disease and that promotes change in the biomedical research culture. The BIH is funded 90 percent by the Federal Ministry of Education and Research (BMBF) and 10 percent by the State of Berlin. The two founding institutions, Charité – Universitätsmedizin Berlin and Max Delbrück Center for Molecular Medicine in the Helmholtz Association (MDC), were independent member entities within the BIH until 2020. As of 2021, the BIH has been integrated into Charité as the so-called third pillar; the MDC is privileged partner of the BIH.

**Position**

The BIH Center for Regenerative Therapies (BCRT) is a translational research center of the Berlin Institute of Health (BIH) at the Charité-Universitätsmedizin Berlin (Charité), which pursues the rapid implementation of new research results in the field of regenerative medicine in clinical applications and products. At the BCRT, engineers, chemists, biologists and physicians work together on the targeted promotion of the body's own healing and regenerative powers in acute and chronic diseases in the clinical research fields of the immune system, musculoskeletal system, cardiovascular system, rare diseases as well as tissue homeostasis and cachexia. The decentralized science management of the BCRT is a service provider for researchers, supporting them in all matters, but especially in the areas of strategy development and administration, and ensures the integration with the central business areas of BIH & Charité.
Responsibilities

Together with the BCRT Steering Committee, you will shape the further development of the center in terms of content and concept. Your team includes the members of the Scientific Center Management of the BCRT and mediates the interests of the scientists with those of the organizations (BIH, Charité, partner institutes and clinics, international partners). You provide support for:

- The steering committee of the BCRT in the conceptual, strategic and operational further development of the centre,
- The establishment and expansion of national and international networks in science and industry, investors and other partners in healthcare in the development of innovative therapy approaches,
- The researchers of the BCRT by providing scientifically adequate structures along the research and value chain and as a service provider in the development of strategies for implementation in clinical practice,
- Further development of the Scientific Center Management and supporting the team members in their demanding tasks.

Requirements

- Completed scientific university degree (doctoral degree desirable) in natural or life sciences or in the economic/administrative or legal field
- Experience in science or innovation management and in applying for research project funding (ideally in a translational-oriented medical research environment)
- Professional appearance
- Sound knowledge of spoken and written English
- Management experience in the coordination of interdisciplinary groups would be desirable
- Experience in moderation and presentation of research structures would be desirable
- Personal initiative, ability to think analytically and plan strategically,
- "Service awareness" for science
- Consistently goal and result orientated as well as having decision-making power
- Organizational skills, fluent in negotiations and creative problem solving. Experience in conflict management would be desirable
- High commitment and emotional intelligence to further strengthen the productive working atmosphere in the team

Application procedure (deadline etc.)

We live diversity!

BIH strongly encourages qualified women to apply. Applications from people with an immigrant background who meet the hiring requirements are expressly encouraged. Severely disabled applicants and those with equal status will be given preferential consideration in cases of equal suitability.
Please submit your application via the BIH Career portal https://jobs.bihealth.org by 22.03.2022, quoting the reference number BIH-126.22. We are looking forward to hear from you!

You can find more information about BIH at https://www.bihealth.org/en/

Contact

We offer:
• A varied job in a forward-looking research institute
• A permanent full-time position (39h/week)
• Remuneration taking into account personal requirements up to salary group 15 TVöD VKA
• 30 vacation days per year (with a five-day week) and up to 24 flextime days per year
• Additional benefits customary in the public sector (e.g. annual bonus, VBL)
• Flexible working hours and option of homeoffice for a better work-life balance
