Title Labex EpiGenMed International Postdoctoral Program - Health & Biology - Postdoctoral positions

Institution Labex EpiGenMed - University of Montpellier

The Labex (Laboratory of Excellence) EpiGenMed is a Health Sciences interdisciplinary collaborative research program at the University of Montpellier that involves 58 leading research laboratories in 14 scientific institutes in the area. Five major axes of research are supported by this initiative:

- Genome and Epigenome
- Cell Cycle, Cell Fate and Development
- Infection and Immunity
- Integrating Systems in Neuroscience
- Biophysics and Systems Biology

EpiGenMed's main mission is to recruit doctoral students, post-doctoral fellows, and high-level scientific researchers from all over the world. This Labex also organizes and funds training actions and scientific events in Montpellier and is involved in the industrial exploitation of research results.

Position Please find the list of the EpiGenMed laboratories which are currently accepting postdoctoral applications and more information on the projects on our website: www.epigenmed.fr

Successful postdoctoral candidates will obtain a postdoctoral contract for a period of 2 years (a one-year contract, renewable once for one year) at Montpellier University funded by EpiGenMed.

Responsibilities More information on the postdoctoral offer and contact information of the team leaders are available on our website : <https://www.epigenmed.fr/index.php/international-programs/postdoctoral-program>

Requirements

Application procedure (deadline etc.)

Candidatures should be sent directly to the PI proposing a postdoctoral position.
More information on the postdoctoral offer and contact information of the team leaders are available on our website : <https://www.epigenmed.fr/index.php/international-programs/postdoctoral-program>

Contact

For questions on the job offer please contact the concerned PI.
