   Faculty of Business (and its Departments: Applied Health Sciences, Business Administration, Media, Business Information Systems as well as Accounting, Taxation and Commercial Law)

   Faculty of Engineering (and its Departments: Industrial Engineering, Computer Sciences, Electrical Engineering, Mechanical Engineering and Mechatronics)

4. Position, scientific requirements, topic, discipline*:

   PostDoc Position:

   We are generally open for research propositions. Momentarily there are two clusters, one focusing on electrical chemistry (e-mobility, hydrogen as fuel for e-mobility and lithium-ion batteries) and the other on industry 4.0 related topics (Big Data, IoT, Cloud Computing etc.).

   The main expertise of our staff lies in practical and application-oriented research. Therefore we encourage applications which are primarily concerned with validating basic research findings, building and testing prototypes, market research and so forth.
Due to our unique structure and the institutionalized cooperation with industry partners and SMEs, we can offer inclusion into a large network as well as training opportunities.
