¹ MSCA Individual Fellowships are selected on the basis of annual calls for proposals. Forthcoming and open calls for proposals can be found on the [Participant Portal](#) of the European Commission under “Funding Opportunities” and “Calls/H2020”.

5. Project idea/position (scientific requirements, topic, discipline):

Rough outline of idea/position:

One of the main visible trends and transformations in Europe is linked to an ongoing digitalization. Young people are often described as “digital natives” which sounds as if the dealing with the digitalization were “inborn/inherent”. Too often it is forgotten that there are still questions and also challenges: e.g. to map and explain the (possible) risks and benefits (for the young and/or society) or differences in the access to information and communication technology (ICT).

The position should contribute to a scientific exchange and over all collect and map the main challenges (that are in common and also that are divers across Europe) as well as good practice examples for a successful growing up with this benefits and risks.

Requested work-/research-experience: children and youth; ICT

Discipline: Sociology, Psychology; Education

Please tick:

- ☐ Life Sciences
- ☐ Natural Sciences
- ☐ Engineering Sciences
- ☒ Social Sciences and Humanities

6. Deadline² for considering interests by post-doctoral applicants:

4/2018; At the very latest two months prior to the deadline of the respective call.

² Please consider that the preparation of a Marie Skłodowska-Curie proposal requires some time. Fellow and supervisor have to agree on a project and training opportunities for the fellow.
