**5. Project idea/position (scientific requirements, topic, discipline):**

Rough outline of idea/position:

The IOS explores society and history of East and Southeast Europe. It brings historical, economic and political science expertise to bear on research fields that are oriented towards transnational and comparative perspectives. Geographically, the focus lies on Southeast Europe and the territory of the former Soviet Union, thematically, on governance, migration and labor relations.

We encourage researchers in history, economics, political science and cognate fields with innovative ideas for research on Eastern and Southeastern Europe to consider us as a host for a Marie Curie application.
