The Leibniz Institute for Educational Trajectories (LifBi) aims to promote longitudinal studies in educational research in Germany. LifBi thus provides fundamental, transregional, and internationally significant, research-based infrastructure for empirical educational research at its location in Bamberg

<sup>1</sup> MSCA Postdoctoral Fellowships are selected on the basis of annual calls for proposals. Forthcoming and open calls for proposals can be found on the [Funding & tender opportunities Portal](#) of the European Commission.

The four departments of the Institute have different thematic orientations and are divided into separate working units offering various opportunities to connect research ideas.

*Department 1* contains the working units Competencies, Learning Environments, Personality, and Early Childhood and School Education, which are the pillars of NEPS with an essential reference to psychological and pedagogical research traditions.

*Department 2* includes the working units Educational Decisions and Social Inequality, Migration, Returns to Education, as well as Structures and Systems; here, the NEPS pillars can be found with a mainly sociological and economic background.

*Department 3* encompasses the Research Data Centre (RDC), Methods Development, as well as Software Development.

The *Center for Study Management (ZSM)* consists of four working units: Study Administration and Controlling, Survey Coordination, Study Communication and Survey Technology.
