Job posting

**Type of position**
- ☒ scientific
- ☐ administrative

**Target group**
- ☒ graduates
- ☐ post docs
- ☐ other

**Title**
13 PhD positions Life sciences/bioinformatics (funded for three years)

**Institution**
MeInBio is a DFG funded PhD research training group at the University of Freiburg, Germany and the Max Planck Institute of Immunobiology and Epigenetics Freiburg, Germany. It aims at a dual education in bioinformatics and wet laboratory methods to explore the spatio-temporal dynamics of gene regulation using high-throughput and high-resolution methods.

**Position**
We are looking for junior researchers with expertise either in life sciences (molecular biology, cell biology, molecular medicine, biochemistry), or in bioinformatics/informatics/statistics. Our dual education profile requires a strong interest for training in the respective other field.

**Responsibilities**
Research in one of the outlined PhD projects, and additional curricular events. MeInBio PhD researchers have a mandatory monthly oral progress report series where two of them present the current status of their project. Moreover, courses towards further qualification and to acquire soft skills are offered, some of them are mandatory.

**Requirements**
Candidates should
- Have an excellent recent university degree
- Be passionate about science and highly motivated
- Have a strong affection to acquire both, biological and informatics knowledge
- Be fluent in written and spoken English

**Application procedure (deadline etc.)**
For further details concerning the positions, information on the individual research groups, as well as the application procedure please refer to www.meinbio.uni-freiburg.de

Only online applications through the web site will be considered.
